

## JVA M3 Mains Energiser

PTE2232

### Overview:

The JVA M3 Mains Energiser is a 240Vac powered electric fence energiser. The JVA M3 Mains Energiser is suitable for small to moderate permanent electric fences. At 3 Joules (peak output energy) it is powerful enough to power up to 30km\* of fence.

\*The actual acres or kilometres of fence powered by this energiser depends on your farm fence conditions and therefore varies greatly. The best method to compare energisers is to use pulse output energy (Joules)

### Features:

- LED Energiser and fence status indicator
- Large easy to use fence terminals
- O-Ring sealed enclosure for ant and moisture protection
- Lightning protection
- Easy to mount on wall with 2 screws
- Approved to Australian Safety Standards
- UV stable enclosure

### Specifications:

<b>Output</b>	Peak Voltage: Peak Energy:	8 kV 3 J
<b>Size</b>	Height: Width: Depth:	180 mm 155 mm 115 mm
<b>Weight</b>	Product: Packed:	1.53 kg 2.0 kg

### Package Contents:

- JVA M3 Mains Energiser
- Instructions

### Warranty:

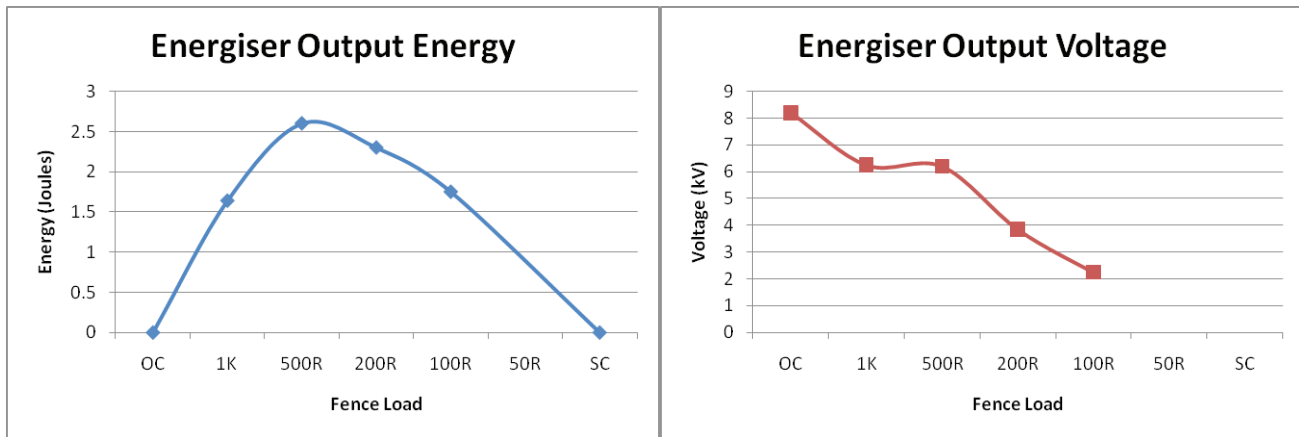

3 Year Manufacturer Warranty (excluding lightning damage)
