

JVA Cellular Gateway

PTE0320

Overview:

The JVA Cellular Gateway allows easy remote control and monitoring of Z-Series Energisers and Monitors by your mobile phone or computer, through JVA's Cloud Router® system. It also includes extra inputs and outputs to interface with other security equipment or ancillary equipment such as an electric gate motor. For more information on the Cloud Router® system, visit <http://jva-fence.com/security/cloudrouter> or contact JVA.

Features:

- Compatible with all JVA Z series energisers and monitors
- Monitors and controls up to 15 devices (linked via Keypad bus) as well as two inputs and two output relays
- 2G and 3G versions available, with frequencies to suit all countries
- No configuration required
- Takes a standard micro-SIM
- Very low data usage means SIM credit lasts up to a year
- Additional SMS-based control and monitoring
- Can be used in conjunction with Perimeter Patrol

Specifications:
