Fence Voltage:	0.0kV
Stored Joules:	0.0J
Supply Voltage:	14.6V
IP Energizer IP Address:	192.168.2.10

ON   OFF

IP Energizers®

The JVA IP Energizer®

The JVA IP Energizer® and IP Energizer Controller® app combine the latest technology to provide you with the ultimate, in farm control.
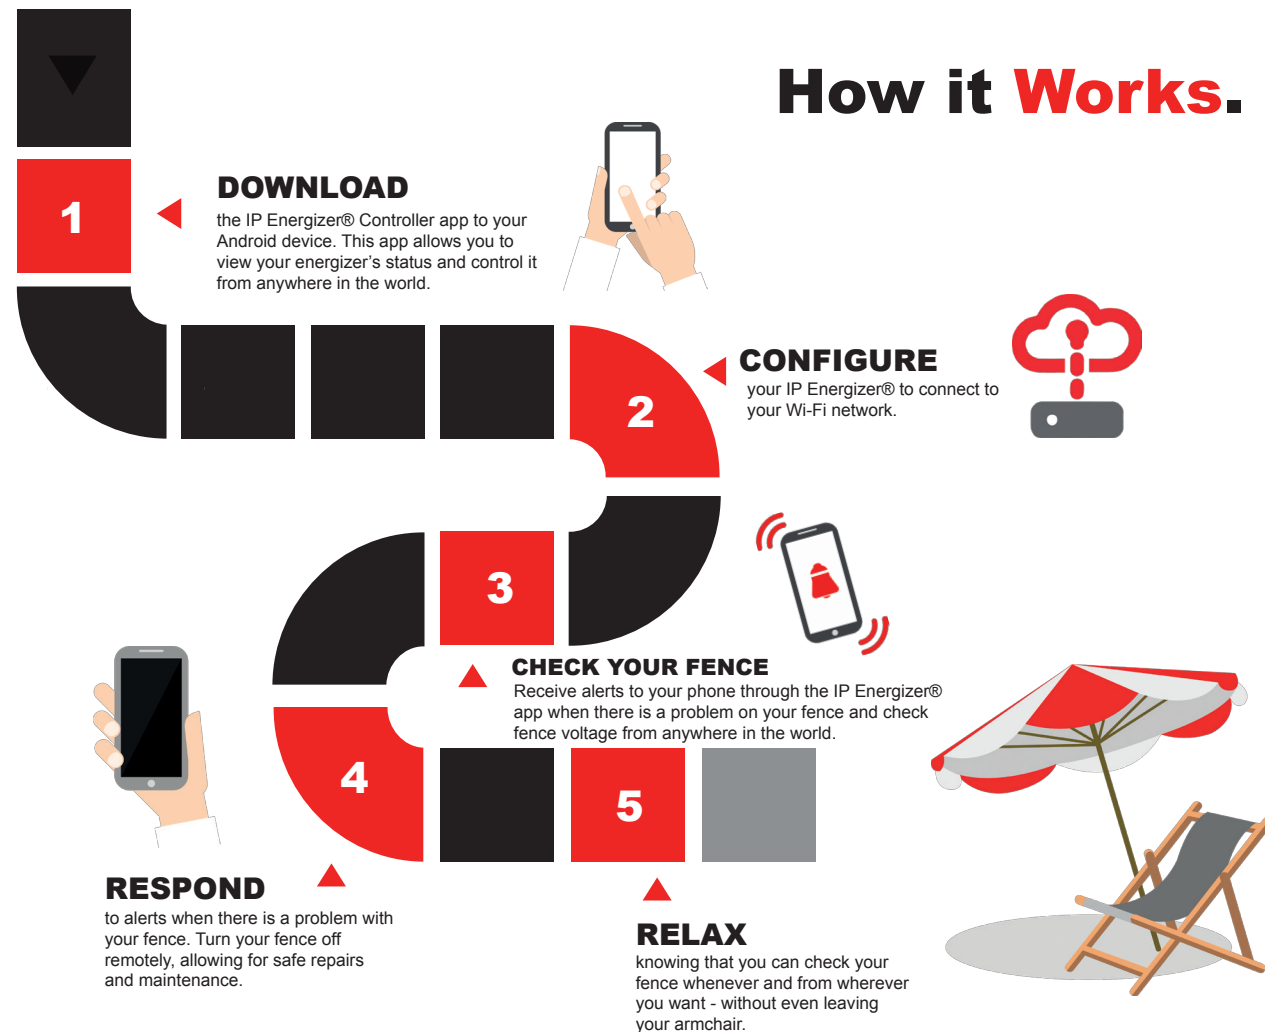

Compared to more complex fence monitoring systems, the IP Energizer® is an all-in-one solution to farm management – no need for extra devices or complex and expensive systems. With in-built wireless capabilities, simply connect your energizer to a Wi-Fi network and download the IP Energizer Controller® app to your Android smartphone for convenient and reliable fence monitoring from anywhere in the world.

The energizer works by sending updates and alarms to your phone via your home or farm's local Wi-Fi network. With the JVA IP Energizer®, electric fence management becomes a breeze, improving efficiency and ease of monitoring. When problems do occur, the IP Energizer® keeps you in control, allowing you to turn the energizer off and on remotely at the touch of a button.

The JVA IP Energizer® and IP Energizer Controller® app can transform the way that you manage your electric fence, saving you time and money.

How it Works.

1 DOWNLOAD
the IP Energizer® Controller app to your Android device. This app allows you to view your energizer's status and control it from anywhere in the world.

2 CONFIGURE
your IP Energizer® to connect to your Wi-Fi network.

3 CHECK YOUR FENCE
Receive alerts to your phone through the IP Energizer® app when there is a problem on your fence and check fence voltage from anywhere in the world.

4 RESPOND
to alerts when there is a problem with your fence. Turn your fence off remotely, allowing for safe repairs and maintenance.

5 RELAX
knowing that you can check your fence whenever and from wherever you want - without even leaving your armchair.

Remote on/off

Real-time information for 24/7 monitoring and complete peace of mind

Controllable from anywhere in the world with internet access

Easily connects through your existing home Wi-Fi network
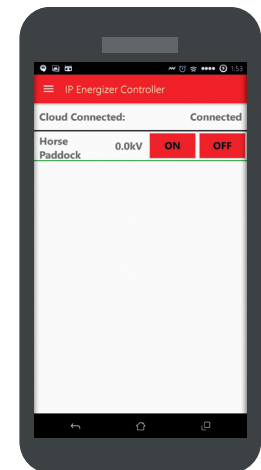

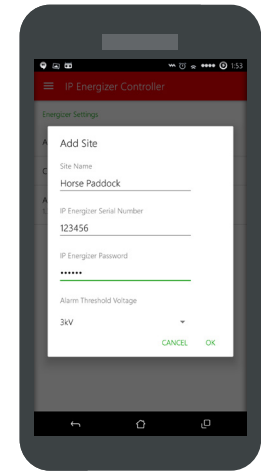

Password access for additional security

Customisable alarm notifications for changes in fence voltage

Add and control multiple energizers from the one app

Backed by manufacturer's technical support

The MB8, MB12 & MB16 energizers are the first JVA models to receive Wi-Fi capability.

These models still include an audible warning if there is a serious fault on the fence, Auto-sync™ Technology for safer fences and an LCD showing fence voltage, stored energy and battery voltage.
